Product Overview

A compact, high-automation production line designed for efficient noodle manufacturing.

Automated Instant Cup Noodle Production Line

This automated production line is designed for high-efficiency manufacturing of instant cup noodles, offering a compact footprint and stable performance. It handles the entire production process from initial flour feeding to final packaging, making it an ideal solution for small-to-medium-sized enterprises. The system features adjustable settings for noodle thickness and shape, ensuring versatility and consistent quality across different product types.

Technical Specifications

全自动小型方便面生产线_04

食品样品 Food sample

The system supports the production of various noodle shapes, including round and square blocks.

Daily Capacity

10000 pcs/8h

Max Capacity

Consumption Methods

Boil • Soak with hot water

Primary Raw Material

Wheat Flour

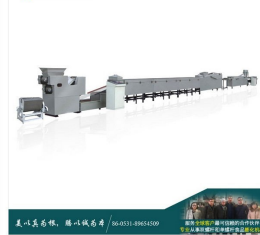

Available Noodle Shapes

Round, Square, Rectangle

Process Flow

全自动小型方便面生产线3

The systematic production flow from raw flour mixing to final packaging.

Production Workflow

- Flour mixing
- Compounding
- Boiling
- Cutting and bending
- Frying
- Cooling
- Packaging

Operational Features

Stainless steel construction ensures hygiene and durability for continuous operation.

Adjustable Parameters

- Noodle thickness
- Noodle width
- Shaping box configuration

Automation Level

Fully Automatic
