Overview

Precision Liquid & Paste Filling Solution

This automated liquid filling machine is engineered with a high-grade stainless steel body, ensuring full compliance with food hygiene standards. Designed for versatility, it handles both liquids and pastes—such as honey, juice, and water—with high accuracy. Its compact design allows for seamless integration into existing production lines or standalone use in smaller facilities, offering easy disassembly for rapid cleaning and disinfection.

Technical Specifications

Compatible Materials

- Liquids
- Pastes
- Honey
- Juice
- Water
- Creams

Operational Features

One-key start • Adjustable parameters • Compact design • Easy disassembly • Food hygiene compliant

Construction Material	Stainless Steel
Operation Modes	Automatic, Semi-Automatic
Control System	PLC Control System with Touchscreen Interface
Target Industries	Food & Beverage, Pharmaceutical, Cosmetic
Filling Mechanism	Pneumatic cylinders with conical hopper
