Overview

Automated Multi-Function Packaging Line

This customized filling production line offers a comprehensive solution for automated packaging, integrating bottle management, washing, drying, and filling into a single, cohesive system. Designed for versatility, the back end of the line can be seamlessly expanded with additional modules such as capping, labeling, and shrinking machines. Constructed from durable stainless steel, this system is engineered to meet the high standards of hygiene and efficiency required in the food, beverage, pharmaceutical, and cosmetic industries.

System Capabilities

Compatible Modules

- Capping machine
- Labeling machine
- Shrinking machine

Integrated Functions

Bottle Management, Bottle Washing, Drying, Filling

Construction & Design

Material

Stainless Steel

Mobility

Yes

Operation & Control

Safety Features

- Emergency stop button
- Protective enclosures

Control Interface

Digital display control panel
