

Automated Multi-Head Weigher Packaging Machine

This packaging machine employs a multi-head weigher system to accurately weigh and dispense products. It features stainless steel construction and a user-friendly touchscreen interface.

Overview

High-Precision Packaging Solution

This automated multi-head weigher packaging machine is engineered for superior accuracy and efficiency in product weighing and dispensing. Built with durable stainless steel, it ensures high standards of hygiene and long-term reliability in demanding production environments. The system features an intuitive touchscreen interface, allowing operators to easily adjust parameters for customized weighing to meet specific production requirements.

Technical Specifications

Construction Material	Stainless Steel
Weighing System Type	Multi-head weigher
Suitable Products	Granular products, Free-flowing products

Features

Operational Capabilities

- Adjustable weighing parameters
- Automated dispensing
- High-precision measurement

Control Interface	Touchscreen
