Product Overview

High-Efficiency Noodle Leaf Production

This automated noodle leaf production line is engineered to meet the diversified demands of modern food processing. Featuring a versatile design, the system allows for the production of both standard noodle leaves and butterfly-shaped noodles on a single line, with seamless switching capabilities. The equipment ensures consistent quality through advanced heat energy utilization and a specialized seven-layer drying process.

Performance Metrics

Daily Production Capacity

3 T

Minimum Daily Output

18 T

Maximum Daily Output

Technical Specifications

Drying Zones

- Upper Heat Drying Zone
- Lower Cooling Drying Zone

Dryer Configuration

7 layers

System Capabilities

Heat Energy Recycling, Mesh Belt Turning, Cooling Conveyor, Dual-Purpose Operation

Service & Support

Included Services

- Equipment Installation
- Commissioning
- Operator Training
