

# Automated Orange Juice Vending Machine

This automated vending machine dispenses fresh orange juice. It features a transparent display showcasing the juice-making process and multiple payment options.

## ADDITIONAL IMAGES

## Product Overview

### Intelligent Fresh Juice Solutions

This automated orange juice vending machine offers a seamless, self-service experience for high-traffic environments like malls and airports. Equipped with advanced cloud-based software, it provides operators with real-time sales statistics, material consumption tracking, and proactive maintenance alerts. Designed for efficiency and reliability, the system ensures optimal inventory management through intelligent remote monitoring and automated notifications.

## Smart Features

### Remote Monitoring Features

- Real-time sales statistics tracking
- Material consumption monitoring
- Intelligent visual remote control
- Cloud-based software management

### Automated Alerts

Low material warning, Fault detection, Restocking notifications

## Design & Build

### Design Highlights

Transparent product display • Digital advertising screen • Mobile design • Commercial grade

## Payment & Operation

### Payment Options
