

Automated Paper Cutting Machine

This machine is designed for cutting paper with precision. It features a programmable control system, hydraulic clamping, and a safety light curtain.

Product Overview

High-Precision Paper Cutting Solution

This automated paper cutting machine is engineered for professional print finishing, offering high-precision performance for commercial printing, bookbinding, and packaging applications. It features a programmable control system for automated cutting sequences and a hydraulic clamping system to ensure secure, accurate paper handling. Built with a robust cutting blade and durable construction, this machine delivers consistent results while prioritizing operator safety through an integrated light curtain system.

Key Features

Core Capabilities

- Programmable automated cutting sequences
- Hydraulic clamping system
- Integrated safety light curtain
- Heavy-duty blade construction

Ideal Use Cases

Commercial Printing, Bookbinding, Packaging

Safety & Control

Safety Compliance

Safety Light Curtain • Hydraulic Clamping
