

Automated Parcel Locker System

This automated parcel locker system is designed for efficient and secure package delivery and retrieval. Its modular design and durable construction make it ideal for residential, commercial, and logistics facilities.

Overview

Automated Parcel Locker System

This advanced automated parcel locker system provides a secure and efficient solution for modern package delivery and retrieval. Designed with a robust Windows-based operating system, it supports versatile user authentication methods including swipe cards, WeChat integration, and scan-code storage. The system ensures reliability with comprehensive alarm monitoring and the ability to operate even during network interruptions.

Technical Specifications

Touch Screen Options

- 15 inch capacitive touch
- 32 inch capacitive touch

Rated Voltage	220 V
Operating System	Windows

Features & Security

Alarm Systems

Unclosed Door Alarm • Network Cut Alarm • Power Cut Alarm

Access Methods	Swipe Card, WeChat, Remote Control, Scan Code
Monitoring	No blind spots in the opposite direction

Climate Control

Thermostat Features

- Electronic remote thermostat
- Remote temperature control
- Remote stop-start compressor
- Timed stop compressor

Dimensions & Configuration

Compartment Dimensions

Configuration	Dimensions (W×D×H mm)
22-door model	1067 × 483 × 2000
32 inch model	560 × 350 × 2000
15 inch model	370 × 350 × 2000
