

# Automated Rotary Container Filling and Sealing Machine

This automated rotary packaging machine is designed for high-speed filling and sealing of containers. It features stainless steel construction, multiple filling heads, and a programmable logic controller (PLC) for precise control.

## Product Overview

### High-Speed Automated Filling and Sealing

This automated rotary packaging machine is engineered for the efficient, high-speed filling and sealing of various containers. Built with robust stainless steel, it features multiple filling heads and an integrated conveyor system to streamline production workflows. Equipped with a programmable logic controller (PLC), the system offers precise control over filling volumes and operational speeds, making it a versatile solution for the food, beverage, pharmaceutical, and cosmetic industries.

## Technical Specifications

Construction Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)
Filling Mechanism	Multiple filling heads
Safety Features	Safety Enclosures, Adjustable Parameters

## Application Suitability

### Target Industries

- Food Industry
- Beverage Industry
- Pharmaceutical Industry
- Cosmetic Industry

### Product Types Handled

Liquid • Semi-liquid
