

Automated Sewing Machine for Garments and Accessories

This automated sewing machine is designed for precise stitching on garments, shoes, and accessories. It features a programmable control panel, pneumatic clamps, and a high-speed sewing head.

Overview

Precision Automated Sewing Solution

This automated sewing machine is engineered for high-precision stitching across a variety of applications, including garments, shoes, and accessories. It features a programmable control panel for pattern customization and pneumatic clamps to ensure secure material holding during operation. Designed for high-speed production, this unit delivers consistent quality, making it an ideal choice for intricate designs and demanding manufacturing environments.

Technical Specifications

Sewing Speed	1500 RPM
Clamping Mechanism	Pneumatic clamps
Control System	Programmable control panel

Applications

Suitable Applications	Garments, Shoes, Accessories
