

Automated Soldering Machine with Adjustable Temperature

This automated soldering machine is designed for precise and repeatable soldering. It features adjustable temperature control, automated solder feed, and a foot pedal for hands-free operation.

Product Overview

Precision Automated Soldering System

This automated soldering machine is engineered for high-precision and repeatable electronic assembly and rework tasks. Equipped with advanced adjustable temperature control and an automated solder feed system, it significantly improves efficiency in small-scale manufacturing environments. Designed for professional use, the foot pedal operation ensures hands-free control, allowing operators to focus on delicate soldering joints.

Technical Specifications

Operational Capabilities

1 Automated

Operation Mode

Key Features

- Adjustable temperature control
- Automated solder feed mechanism
- Hands-free foot pedal operation
- Retract function for precision

Certifications & Standards

Precision Assembly, Electronic Rework Ready
