Overview

Automated Warehouse Storage Systems

This automated warehouse system provides a high-efficiency solution for storing and retrieving materials without direct human intervention. Utilizing multi-layer shelving and advanced roadway stacking cranes, the system enables computer-controlled inventory management and automated access. Designed for versatility, this system is ideal for optimizing space in modern logistics, manufacturing, and distribution environments.

Technical Specifications

Material	Steel Q235B
Finish	Corrosion Protection
Color Options	Blue, Orange, Grey, Customized
Installation Instruction	Yes

Performance Metrics

Load Capacity per Layer	500-6000 kg
-------------------------	-------------

Stacker Crane Details

Stacker Crane Configurations

Type	Load Capacity	Max Rack Height
Light Duty	20-200 kg	d 25n
Mid Duty	250-1500 kg	d 25n
Heavy Duty	2.0t / 2.5t / 3.0t	d 25n
