

Automated Swimming Pool Surface Skimmer

This automated skimmer is designed for cleaning swimming pool surfaces. The device autonomously navigates the pool, collecting debris into its integrated collection tray.

Product Overview

Professional Automated Pool Maintenance

This automated pool surface skimmer combines elegant, boat-like design with agile performance to keep your pool pristine. Designed to collect floating debris efficiently, it utilizes interchangeable nets and remote-controlled navigation to ensure comprehensive coverage. Its compact, patent-protected design is easy to store and adapt to varying water levels, making it an essential tool for professional pool care.

Technical Specifications

Battery Capacity

1800 mAh
Capacity

30 min
Runtime

Operational Indicators

Battery Status Indicator, Remote Control Operation

Design and Utility

Key Features

- Adaptable to different water levels
- Reversible collecting net cartridge
- Easy to remove collection net
- Space-saving storage design

Intellectual Property

Patent Protected

Cleaning Capabilities

Debris Compatibility

- Leaves
- Insects
- Seeds
- Small floating particles
