

# Automated Teller Machine for Cash Dispensing

Automated Teller Machine (ATM) designed for secure cash dispensing and financial transactions. It features a user interface screen, card reader, cash dispenser, receipt printer, and secure enclosure with locking mechanisms.

## Overview

### Secure Self-Service Banking Solution

This Automated Teller Machine (ATM) is engineered for reliable cash dispensing and secure financial transactions. Designed for 24/7 operation, it features a robust enclosure with advanced locking mechanisms, making it ideal for indoor deployment in banking halls and high-traffic retail environments. The integrated interface includes a user-friendly screen, card reader, and receipt printer to facilitate seamless self-service banking.

## Technical Specifications
