

Automated Toilet Soap Production Line, 1200 kg/h

This automated production line manufactures toilet soap at a rate of 1200kg per hour. The system incorporates soap feeding, mixing, forming, cutting, and packaging equipment for continuous and efficient operation.

Product Overview

High-Efficiency Soap Manufacturing

This automated production line is engineered for high-volume toilet soap manufacturing, delivering a consistent output of 1200 kg per hour. The comprehensive system integrates essential processes including soap feeding, mixing, forming, cutting, and final packaging. Designed for industrial-scale operations, it combines robust mechanical construction with advanced electronic control systems to ensure continuous, reliable, and high-quality production.
