Product Overview

Efficiency and Precision

The TD-E Pro Series automated twist tie applicator is specifically engineered for the food, bakery, and consumer goods industries. It delivers exponential speed compared to manual tying, ensuring consistent, air-tight, and professional seals. Its robust, portable construction makes it a reliable asset for demanding high-volume production environments.

Certifications & Quality

Industry Standards

ISO, UL, CE, SGS

Technical Features

Machine Capabilities

- Automated high-speed application
- Air-tight and consistent closures
- Touch screen control interface
- Adjustable tie length and tension
- Stainless steel construction for hygiene
- Compact design for production line integration

Construction

Industrial Grade • Stainless Steel Components • Portable
