

# Automated Water Transfer Washing System

This automated system is designed for efficient cleaning of water transfer printed parts. It features a multi-nozzle spray system, stainless steel construction, and a programmable control panel for customized cycles.

## ADDITIONAL IMAGES

## Product Overview

### Automated Water Transfer Washing System

This industrial-grade washing system is engineered for the efficient cleaning of water transfer printed parts. Featuring a robust 2mm thick 201 stainless steel construction, it ensures durability and resistance to corrosion in high-volume production environments. The unit integrates advanced liquid handling and circulation components to deliver consistent, high-quality surface preparation and rinsing results.

## Technical Specifications

### Water Pump Power

**1500 W**  
Rated Power

### Outer Dimensions (L x W x H)

1.2m x 1.0m x 1.45m

### Material Composition

201 Stainless Steel, 2mm Thickness

### Electrical Requirements

220V 3-phase

## Design Features

### Base Configuration

- 4 Universal wheels for mobility
- 4 Adjustable support feet for leveling

### Plumbing System

Hot water circulation via plastic hose
