Product Overview

Industrial Flour Processing System

This comprehensive wheat processing line is engineered for high-capacity, industrial-scale production. Featuring a multi-storey design, it integrates a multi-stage cleaning and conditioning flow with precise grinding and sifting technology to ensure optimal output. The system is specifically calibrated to produce high-quality flour with low ash content and high extraction rates, suitable for bread, cake, pasta, and biscuit production.

Certifications and Compliance

Quality Standards

SGS Certified, ISO 9001

System Configuration

Included Processing Stages

- 1st Cleaning
- Conditioning
- 2nd Cleaning
- Grinding
- Sifting
- Automatic Packing

Cleaning Technology

Cleaning System Components

Component	Quantity
Separators	3
Wheat Scourers	2
Destoners	2
Magnetic Separators	3

Output Specifications

Flour Grade Compatibility

Bread Flour • Cake Flour • Pasta Flour • Biscuit Flour
