Product Overview

Industrial Wheat Flour Milling Solution

This automated wheat flour milling line is engineered for high-efficiency production of ultrafine wheat flour. The complete production system encompasses cleaning, precision grinding, and integrated packaging control processes. Designed for industrial applications, the line utilizes advanced technology and PLC-based automation to ensure consistent quality and operational ease.

Performance Specifications

Daily Production Capacity

5 t/day Minimum Capacity	500 t/day Maximum Capacity
------------------------------------	--------------------------------------

Popular Configuration Capacities

30t/d, 50t/d, 120t/d

System Features

Included Systems

- Cleaning system
- Grinding system
- Packaging control system
- Pneumatic conveying
- Sifting and purification

Control System

Fully automatic PLC control system

Pipe Material

Stainless Steel
