

Automated Wheat Flour Milling Plant

This automated plant is specialized for wheat processing with capacities ranging from 5T-500T/24H. It features a steel frame and floor structure for robust installation.

Product Overview

Industrial Wheat Milling Solution

This automated milling plant is engineered for high-capacity, large-scale wheat processing in industrial environments. Utilizing advanced separation and grinding technologies, the system effectively separates bran and endosperm to deliver consistent, high-purity flour. The robust, modular construction ensures long-term reliability and flexibility in configuration for various flour grade requirements.

Service & Support

Warranty Period	1 year
Included Services	Special Design, Installation, Commissioning, Worker Training, Spare Parts, Lifelong Support

Technical Features

Key Components

- Precision Roller Mills
- Advanced Separation Units
- Automated Control Systems
- Pneumatic Conveying Network

System Design	Automated, Modular, Pneumatic Conveying
---------------	---

Operations

Applications

Wheat Milling • Maize Processing • Industrial Flour Production
