

Automated Wheat Flour Milling System

This automated system efficiently mills wheat into flour. It offers a range of outputs from 10t to 500t per 24 hours.

Product Overview

Industrial Flour Milling Systems

This flagship flour milling system offers versatile, high-performance processing capabilities for wheat and other granular materials like sorghum, corn, and rice. With scalable configurations ranging from 6 to 500 tons per 24 hours, the system is designed to meet diverse industrial production needs. Each project includes professional design, installation services, and technical training to ensure a seamless turnkey operation.

Industry Experience

50 years of manufacturing excellence

Performance Specifications

Production Capacity

500 T/24h

Maximum Daily Output

6 T/24h

Minimum Daily Output

Compatible Grains

Wheat, Corn, Rice, Sorghum, Pepper

System Configurations

Capacity by Structure Type

Structure Type	Capacity Range (T/24h)
Storey Structure	60-500
Steel Frame Structure	80-200
Half-Elevated Structure	20-60
Horizontal Structure	15-50

Service & Support

Included Services

Turnkey Project • Technical Training • Professional Installation • Lifetime Maintenance • 1-Year Warranty
