Product Overview

High-Efficiency Wheat Milling Solution

This complete wheat flour production line features a robust steel structure designed for high-quality output suitable for bread, biscuit, and pasta manufacturing. The system utilizes advanced cleaning and gentle milling technologies to ensure a low ash content while maintaining a high flour extraction rate. With a two-layer equipment allocation, it offers a cost-effective setup that reduces construction requirements and ensures a fast return on investment.

Technical Specifications

Processing Stages

- 1st Cleaning
- Conditioning
- 2nd Cleaning
- Grinding
- Sifting
- Automatic Packing

Cleaning Technology Inventory

Component	Quantity
Separators	3
Wheat Scourers	2
Destoners	2
Conditioning Units	1
Magnetic Separators	3

Certifications

Compliance and Standards

ISO 9001, SGS Certified

Application

Compatible Flour Grades

Bread Flour • Biscuit Flour • Pasta Flour • Cake Flour
