Product Overview

Automated Cleaning Intelligence

This advanced window cleaning robot utilizes a microcomputer driving system and precise gravity sensors to provide efficient, automated cleaning. Designed for versatility, it supports both Bluetooth app connectivity and remote control, ensuring effortless operation for various glass surfaces. Equipped with a built-in UPS backup system and high-strength safety ropes, the device prioritizes operational safety while delivering professional-grade cleanliness.

Performance Metrics

Cleaning Speed

4 min/sqm

Cleaning Speed

Power Ratings

75 W

Power Output

24 V

Input Voltage

Technical Specifications

Sensors	Gravity Sensor, MEMS Sensor, Edge Detection
Unit Size	350 x 350 mm
Adapter Input	100-240VAC, 50/60Hz

Operational Features

Control Options

- Bluetooth App
- Infrared Remote Control

Safety Equipment

- Built-in UPS (Uninterruptible Power System)
- High-strength safety rope
- Automatic return to start position

Applications

Surface Compatibility

Windows • Mirrors • Walls • Desktops
