

# Automatic AC Voltage Stabilizer

This AC automatic voltage regulator ensures a consistent voltage supply. It is equipped with an analog display for monitoring voltage levels and multiple output sockets.

## Product Overview

### Reliable Voltage Protection

This Automatic AC Voltage Stabilizer is designed to provide consistent and stable power output, protecting your sensitive electronic equipment from harmful voltage fluctuations. Featuring a robust design and clear analog monitoring, it ensures your devices operate within safe voltage ranges. It is an essential solution for maintaining equipment longevity and performance in environments with unstable power grids.

## Technical Specifications

Model	AVR-500W
Input Voltage	220V-240V
Output Voltage	110V-120V

## Certifications

Quality Standards	ISO9001
-------------------	---------

## Key Features

### Core Features

- Fully automatic relay stabilization
- Analog voltage display monitor
- Multiple output sockets
- Durable construction
