

Automatic Aluminum Foil Sheet Cutting Machine

This automatic foil guillotine cutter machine cuts aluminum foil rolls into sheets of desired lengths. It can also process copper foils, non-woven fabric, wallpaper, PVC film, and PE film.

Product Overview

High-Precision Automatic Foil Cutting

This fully automatic guillotine cutter is designed to efficiently convert rolls of aluminum foil into sheets of precise lengths. Beyond aluminum, it is highly versatile, capable of processing copper foil, non-woven fabrics, wallpaper, and various plastic films like PVC and PE. Its high-speed operation and precision cutting make it an essential tool for industrial material processing.
