

# Automatic Band Sealer

This automatic band sealer is designed for high-volume packaging operations. It features adjustable conveyor speed and sealing temperature control.

## ADDITIONAL IMAGES

## Overview

### Continuous Sealing Efficiency

This automatic band sealer offers high-efficiency continuous sealing for various packaging lines, featuring electronic constant temperature control and an automated conveying system. Engineered for versatility, the machine supports both horizontal and vertical operation, making it suitable for sealing dry goods and liquid products alike. Built with a focus on hygiene and reliability, it is an ideal solution for food and pharmaceutical packaging applications.

## Technical Specifications

### Construction Material

Stainless Steel • Spray Painting

### Integrated Features

- Electronic constant temperature control
- Automatic conveying device
- Printing device (date, batch number, etc.)
- Counting device
- Emergency stop button

### Operating Orientation

Horizontal, Vertical

## Applications

### Suitable Industries

Food, Pharmaceuticals, General Packaging

## Performance

### Key Performance Indicators

#### 1 Step

Sealing and Printing
