

Automatic Beer Keg Washer

This automatic beer keg washer is designed for efficient and thorough cleaning. It features a programmable logic controller (PLC) for automated operation and stainless steel construction for durability.

Overview

Professional Keg Cleaning Solution

This automatic beer keg washer is designed for efficient, thorough, and hygienic cleaning of stainless steel barrels. Featuring a high-powered water pump, programmable operation, and integrated steam sterilization, it ensures reliable sanitation for beverage production facilities. The system includes advanced water temperature control and lye cleaning capabilities, while offering significant water savings of up to 50% per cycle.

Performance & Efficiency

Water Savings

50 %

Water Usage Reduction

Cleaning Capabilities

- High-powered water pump
- Lye cleaning support
- Steam sterilization
- CO2 prepare press function

Technical Specifications

Construction Material	Stainless steel
Safety Components	Steam sterilization, Polyamine ester rubber plate, Reliable localization

Operation

Control System	Programmable logic controller (PLC) with digital display
Automation	Yes
