

# Automatic Beverage Rinsing Filling Capping Machine

The automatic machine is designed for rinsing, filling, and capping beverages. It integrates bottle washing, precise filling, and secure sealing into a single, efficient process.

## Product Overview

### Integrated Beverage Processing Solution

This automatic three-in-one monoblock system is engineered for efficient rinsing, filling, and capping of fruit juices and various beverages. By integrating bottle washing, precise filling, and secure sealing into a single unified process, it streamlines production workflows. Designed for large-scale operations, the system prioritizes high hygiene standards and consistent operational speed.

## Technical Specifications

### System Type

Monoblock • 3-in-1

### Suitable Products

- Fruit Juice
- Beverages

### Model

RGCF32-32-10

### Functions

Rinsing, Filling, Capping
