

Automatic Bottle Capping Machine

The automatic bottle capping machine is designed for high-speed and precise capping of various bottle types. It features a stainless steel conveyor system and adjustable capping heads suitable for diverse industries like food and beverage, pharmaceuticals, and cosmetics.

Product Overview

High-Efficiency Automatic Capping Solution

This automatic capping machine is engineered for high-speed and precise sealing across a wide variety of bottle and cap types. Designed with a durable stainless steel conveyor system and adjustable capping heads, it provides a reliable solution for diverse industrial needs. Its user-friendly control panel ensures easy operation and monitoring, making it an ideal choice for streamlining production lines in the food, pharmaceutical, and cosmetic sectors.

Technical Capabilities

Compatible Applications

Spray Bottles, Pump Heads, Electronic Cigarettes, Plastic Caps, Glass Bottles, Shampoo Bottles, Disinfectant Containers, Cosmetic Cans, Beverage Bottles, Pharmacy Bottles

Design Features

Conveyor Material

Stainless Steel

Machine Features

- High-speed operation
- Precise capping mechanism
- Adjustable capping heads for different sizes
- User-friendly control panel
- Integrated conveyor system

Industry Suitability

Target Industries

Food & Beverage, Pharmaceutical, Cosmetic, Chemical

Operational Specifications

Operation Mode

Automatic
