

Automatic Bottle Filling and Washing Machine

This automatic machine efficiently fills and washes large bottles. It is designed for hygienic processing in the food and beverage industry, ensuring high productivity and consistent quality.

Overview

High-Efficiency Bottle Processing

This automatic filling and washing machine is engineered for large-scale bottle processing in the food and beverage industry. Designed for reliability and hygiene, the system streamlines cleaning and filling operations to ensure consistent output quality. It is an ideal solution for high-volume production lines, such as bottled water facilities, providing robust performance and operational efficiency.

Technical Specifications

Model Identifier	TDS-450
Primary Application	Drinking Water, Beverage Processing, Food Industry

Performance Metrics

System Type
Automatic • Washing & Filling
