

# Automatic Bottle Filling, Capping, and Labeling Machine

This automatic machine integrates bottle filling, capping, and labeling into one seamless process. Constructed with stainless steel, it features a PLC for precise control, adjustable filling nozzles, and a conveyor system.

## Overview

### High-Efficiency Integrated Packaging Solution

This automatic bottle filling, capping, and labeling machine is engineered for high-speed production lines, offering a seamless, all-in-one solution for liquid packaging. Constructed with durable stainless steel, it ensures optimal hygiene standards suitable for beverage, pharmaceutical, and cosmetic industries. The system features a programmable logic controller (PLC) for precise process monitoring and adjustable components to accommodate diverse bottle sizes and shapes.

## Technical Specifications

Model Number	YG9018B
Material	Stainless Steel
Control System	Programmable Logic Controller (PLC)
Safety Systems	Safety Guards, Safety Interlocks

## Operational Capabilities

### Functions

- Automatic Filling
- Automatic Capping
- Automatic Labeling
- Conveyor Bottle Transfer

### Suitable Industries

Beverage • Pharmaceutical • Cosmetics

Versatility	Yes
