

# Automatic Bottle Shrink Wrapping Machine

This automatic shrink wrapping machine is designed for packaging bottles and similar cylindrical products. It features a conveyor system, film feeding mechanism, and a heat tunnel for shrink wrapping.

## Overview

### High-Efficiency Shrink Wrapping Solution

This automatic shrink wrapping machine is engineered for high-volume packaging of bottles and cylindrical products. It integrates a reliable conveyor system, precise film feeding mechanism, and an efficient heat tunnel to ensure consistent, professional-grade results. Built with a robust metal frame, this system is designed to withstand the demands of continuous industrial operation.

## Technical Specifications

### Key System Components

- Conveyor system
- Film feeding mechanism
- Heat tunnel
- Integrated control panel

### Automation Level

Automatic

### Application Type

Bottles, Cylindrical Products, High-Volume Packaging

### Construction

Robust metal frame
