Product Overview

Integrated Bottling Solution

This fully automatic monoblock machine streamlines the entire bottling process by integrating washing, filling, sealing, and labeling into a single, efficient system. Designed for high-volume production, it is ideal for non-carbonated liquids such as water, juice, wine, vinegar, and soy sauce. The integrated design minimizes manual handling and ensures consistent hygiene standards across the production line.

Technical Specifications

Compatible Liquids

- Water
- Wine
- Juice
- Vinegar
- Soybean sauce

Automation Level

Full Automatic

Process Functions

Washing, Filling, Capping, Labeling

Construction Material

Stainless Steel
