

Automatic Bottle Washing Machine

This automatic spray bottle washing machine is designed for high-volume cleaning and preparation of bottles. It utilizes a multi-stage cleaning process and features a stainless steel construction for hygiene and durability.

Product Overview

Efficiency and Performance

This automatic bottle washing machine is engineered for high-volume cleaning and preparation, ensuring hygiene and durability with its stainless steel construction. It features an intuitive control panel for easy monitoring, making it an ideal solution for pharmaceutical, cosmetic, and food processing environments. The system utilizes a continuous, in-phase multi-stage cleaning process to ensure thorough contaminant removal and consistent output.

Technical Parameters

Cycle Times

3 s

Washing Time

2 s

Drying Time

Washing Medium

Sterile water

Water Pressure

0.2Mpa - 0.4Mpa

Operational Details

Key Operational Features

- Stainless steel construction
- Continuous conveyor belt system
- Synchronized rotary table manipulation
- Adjustable washing parameters

Target Industries

Pharmaceutical, Cosmetic, Food Industry
