

Automatic Bottling Machine for Food and Beverage

This automatic bottling machine is designed for filling and packaging food and beverage products. The high-speed machine includes multiple filling heads, a conveyor system, and a control panel for precise operation.

Overview

High-Efficiency Bottling Solution

This automatic bottling machine is engineered for the high-speed filling and packaging of food, beverage, and cereal products. Featuring a robust conveyor system and multiple filling heads, it ensures precise operation and consistent output across various bottle sizes and shapes. Designed for large-scale production environments, this system offers reliable performance and streamlined monitoring for industrial bottling workflows.

Technical Specifications

Key System Features

- Automatic filling operation
- Multi-head filling system
- Integrated conveyor system
- Centralized control panel

Model Designation	CGF404012
Filling Capability	Food, Beverage, Cereal

Performance Metrics

Production Performance

40 heads

Filling Heads
