

Automatic Bowl Sealing Machine

This automatic sealing machine is designed for sealing bowls in a continuous process. It features a stainless steel construction, a conveyor system, and adjustable temperature and pressure controls.

Product Overview

Automatic Bowl Sealing Machine

This automatic sealing machine is engineered for high-volume production lines within the food and beverage industry. It features a robust stainless steel construction, ensuring both hygiene and long-term durability for demanding environments. The system utilizes an integrated conveyor for continuous bowl transport and offers precise control over sealing temperature and pressure, resulting in reliable, airtight, and tamper-evident seals.

Technical Specifications

Construction Material	Stainless Steel
Automation Level	Automatic
Key Features	Airtight Sealing, Tamper-Evident, Adjustable Temperature, Adjustable Pressure, Conveyor System

Industry Application

Industry Usage

Food & Beverage • High-Volume Production
