Overview

Professional Automatic Vacuum Sealing Solution

The QCF Series Pneumatic Vacuuming & Sealing Machine is a robust industrial solution designed for the automatic filling and sealing of plastic cups, bowls, and trays. Engineered with durable steel and 304 stainless steel, it handles a variety of applications including dairy, beverages, and prepared foods. This system automates the entire process, from cup dropping and filling to UV sterilization, date printing, vacuuming, and sealing, ensuring high efficiency and product integrity.

Performance Metrics

Packaging Speed

2000 pieces/h

Packaging Speed

Technical Specifications

Voltage	3-phase 4-line socket (380V 50HZ customized)
Electric Motor Power	1.1 KW
Heat Up Power	1.6 KW
Air Pressure	0.5 - 0.75 MPa
Maximum Air Consumption	0.45 m3/m

Physical Dimensions

Dimensions (L x W x H)	3300 x 850 x 1750 mm
Weight	1200 kg

Features

Key Capabilities

Automatic Cup Dropping, Automatic Filling, UV Sterilization, Date Printing, Vacuuming & Sealing, 304 Stainless Steel Construction

Applications

Suitable Applications

- Drink packaging
- Yogurt containers
- Mineral water
- Pickled food
- Cooked food
