

Automatic Bread Making Machine

This automatic bread making machine features 12 pre-programmed settings for various types of bread. It has adjustable crust color and loaf size selection, along with a fruit and nut dispenser.

Overview

Professional Automatic Bread Maker

This high-efficiency automatic bread making machine is designed for consistent, professional-grade results in both home and commercial kitchen environments. Featuring a robust 550W motor and a 2.0LB capacity, it offers versatile baking options with 12 pre-programmed settings ranging from basic loaves to gluten-free and jam preparation. The durable construction includes a non-stick aluminum alloy pan and stainless steel components, ensuring longevity and ease of cleaning.

Technical Specifications

Power Requirements

550 W

Power Output

230 V

Voltage Option A

120 V

Voltage Option B

Capacity & Performance

2 LB

Maximum Loaf Capacity
