

Automatic Button Attaching Machine with Auto-Feed

This automatic button attaching machine is designed for high-volume production. It utilizes an auto-feed mechanism for efficient button placement and offers programmable control for precise stitching.

Overview

High-Efficiency Button Attaching

This automatic button attaching machine is designed for high-volume production environments, handling both thin and medium-heavy materials with ease. It is particularly well-suited for knitwear and shirt manufacturing, offering precise automation through an advanced 7-inch TFT LCD touch interface. With integrated PLC controls and high-speed, low-noise components, this machine ensures consistent, reliable button placement to streamline your garment production line.

Technical Specifications

Material Compatibility	Thin materials, Medium-heavy materials, Knitwear, Shirts
User Interface	7-inch TFT LCD Touch Screen
Control System	Dual PLC Network Communication

Performance Features

Key Performance Metrics

7 inch

Screen Size

Automation Capabilities

- Auto-monitoring of button width
- Constant monitoring of glide track width
- Automatic track space adjustment based on button thickness
- Advanced air-blowing device for front-button selection

Operational Noise

Low Noise
