

Automatic Cable Stripping Machine

This fully automatic wire stripping machine is designed for processing flat and round sheathed cables. It uses a hybrid drive system with SMC pneumatic components and a microcomputer LCD control.

Overview

High-Precision Automatic Wire Processing

This fully automatic cable stripping machine is engineered for high-efficiency wire preparation, featuring a hybrid drive system and advanced SMC pneumatic components. Controlled by a microcomputer-based full LCD interface, it offers precise multi-step stripping, cutting, and twisting capabilities. Designed for versatility, it handles round sheathed, flat sheathed, and coaxial cables with high stability and accuracy.

Performance Metrics

Processing Speed

4000 pcs/hr
Max Speed

Wire Gauge Capacity

0.1 - 10 Sq.mm (AWG32 - AWG10)

Technical Specifications

Wire Head Stripping Range

250 mm

Wire Tail Stripping Range

70 mm

Drive System

Hybrid Drive, Stepper Motor, SMC Pneumatic Components

Cable Compatibility

Supported Cable Types

- Round sheathed cable
- Flat sheathed cable
- Coaxial cable

Compliance & Quality

Certifications

CE • SGS • ISO 9001

Warranty Period

1 Year
