

Automatic Can Filling and Sealing Machine

This automatic can filling and sealing machine integrates rinsing, filling, and sealing functions into a single unit. It is suitable for filling aluminum or PET cans with various carbonated beverages and features a high degree of automation and precise filling volume control.

Overview

Integrated Beverage Packaging Solution

This automatic can filling and sealing machine is designed to streamline beverage production by integrating rinsing, filling, and sealing into a single, efficient unit. Engineered for versatility, it handles both aluminum and PET cans, making it suitable for carbonated soft drinks, beer, and energy drinks. With high-precision volume control and a reliable sealing mechanism, this system ensures consistent product quality and minimizes leakage risk for professional beverage operations.

Performance

Production Capacity

1000 cph

Cans Per Hour

Technical Details

Construction Material	SUS 304 Stainless Steel
Suitable Beverages	Carbonated Soft Drinks, Beer, Energy Drinks

Compliance & Standards

Certifications

CE • ISO 9001 • UL • BUREAU COC
