Product Overview

High-Efficiency Packaging Solution

The Automatic Carton Folding and Gluing Machine is engineered for precision and high-throughput packaging production. Featuring robust construction and advanced controls, it automates the folding and gluing process to ensure consistent quality across various paper weights and flutes. This versatile system is an ideal choice for facilities looking to optimize productivity and reduce manual labor in high-volume environments.

Performance Metrics

Operating Speed

220 M/min

Max Speed

Technical Specifications

Compatible Board Types	B Flute, C Flute, E Flute, F Flute, Print Board
Paper Weight Range	200 - 700 gsm
Power Requirements	11KW, 380V, 50HZ

Physical Dimensions

Dimensions (L x W x H)	12000 x 1450 x 1400 mm
Weight	3200 kg
