

Automatic Carton Sealing Production Line

This automatic carton sealing production line is designed for high-speed production. The machine efficiently seals cartons of varying sizes with adjustable parameters for optimal performance.

Product Overview

Integrated Carton Sealing Solution

This automatic carton sealing production line is engineered for high-efficiency packaging environments. The system includes an automatic sealing station, an angle edge sealing station, and integrated power roller conveyors to streamline carton handling. Designed for durability and consistent performance, this line enhances productivity while minimizing manual labor costs.

Configuration

Line Components

Component	Quantity
FXJ-5050B Semi-automatic sealing machine	1
JFX-5060 Angle edge sealing machine	1
SJG100 / 661 meter power roller conveyor	2
Electrical control box	1

Performance

System Highlights

High-Speed Processing, Adjustable Parameters, Robust Construction, User-Friendly Interface
