Overview

High-Efficiency Overwrapping Solution

This automatic cellophane overwrapping machine is engineered for high-speed, reliable packaging of boxes, cartons, and similar items. Constructed with durable stainless steel, it prioritizes hygiene and longevity in demanding production environments. The system integrates an automated conveyor feed and an intuitive touchscreen interface, ensuring seamless operation and precise parameter control for various packaging needs.

Technical Features

Automation & Control

- Automated conveyor feeding system
- User-friendly touchscreen interface
- Integrated label applicator
- Status indicator light tower

Construction Material

Stainless Steel

Application

Industry Suitability

Pharmaceuticals • Personal Care • Consumer Goods

Packaging Capabilities

Boxes, Cartons, Cellophane wrapping, Film wrapping
