Overview

Professional Coffee Packaging Solution

This automatic vertical form-fill-seal (VFFS) machine is engineered for the precise packaging of coffee beans and coffee powder. It integrates weighing, filling, and sealing into a single automated workflow, ensuring high efficiency and hygiene. Equipped with a specialized one-way degassing valve applicator, it protects product freshness by preventing bag bursting caused by CO2 release.

Key Features

Key Features

One-way Degassing Valve, Stainless Steel Construction, Vertical Form-Fill-Seal, Touch Screen Control, Food Grade

Technical Specifications

Machine Capabilities

- Automatic bag forming, filling, and sealing
- Integrated weighing and filling system
- Parameter adjustment via touch screen
- Compatible with various film materials

Construction Material

Stainless Steel
