

Automatic Color Touch Screen Flash Point Meter

This automatic flash point tester features a color touchscreen interface. It is designed for determining the flash point of various substances and incorporates advanced technology for precise measurements.

Product Overview

Advanced Flash Point Testing

The Automatic Color Touch Screen Flash Point Meter is a high-precision testing instrument designed for determining the flash point of various substances. Featuring an intuitive color touchscreen interface, this device simplifies operation, data analysis, and workflow management. It is engineered for laboratory and industrial applications where accurate and repeatable flash point measurements are critical for quality control and safety.

Technical Features

Key Capabilities

- Precise measurement technology
- Repeatable results
- User-friendly operation
- Advanced data analysis

Interface	Color Touch Screen
Automation	Fully Automatic
Applications	Laboratory, Industrial, Quality Control
