

Automatic Control Self-Priming Seal-less Pump

This seal-less pump is designed for industrial applications. It features automatic control capabilities and a self-priming function for efficient and reliable operation.

Product Overview

Industrial Seal-less Performance

The SLFZ series automatic control self-priming pump is an advanced fluid handling solution designed for demanding industrial environments. By eliminating mechanical seals, this pump significantly reduces maintenance needs and prevents leakage, extending service life even in continuous operation. Its automatic control features ensure reliable performance and operational efficiency across a diverse range of fluid applications.

Technical Specifications

Flow Rate Capacity

0.75 m³/h
Minimum Flow

6800 m³/h
Maximum Flow

Operating Head

4 m
Min Head

130 m
Max Head

Operating Conditions

Operating Temperature Range	-40 to 180
Maximum Working Pressure	16 bar

Key Features

Core Advantages	Seal-less Design, Automatic Control, Self-priming, Leakage Prevention, Low Maintenance
