

Automatic Cuff Type Shrink Film Packaging Machine

The automatic cuff type shrink film packaging machine utilizes a cuff-type film wrapping system followed by a heat shrink tunnel. It is designed for high-speed and efficient packaging of various products, creating tightly sealed and tamper-evident packages.

Product Overview

High-Efficiency Shrink Packaging Solution

The BZJ800 is an automatic cuff-type shrink film packaging machine engineered for high-speed, efficient operations across diverse industries including food, beverage, pharmaceuticals, and consumer goods. It utilizes a reliable cuff-type film wrapping system integrated with a heat shrink tunnel to produce tightly sealed, tamper-evident packages. Designed for versatility, this machine accommodates a wide range of product sizes and shapes while ensuring long-lasting performance with minimal maintenance requirements.

Technical Specifications

Machine Type	Automatic Cuff Type Shrink Film Packaging Machine
Key Features	Adjustable Conveyor Speed, Precise Temperature Control, Automatic Film Feeding, User-Friendly Control Panel

Application Suitability

Suitable Industries

Food & Beverage • Pharmaceuticals • Consumer Goods
