Overview

High-Efficiency Cup Packaging Solution

This automatic cup filling and sealing machine is a versatile, high-performance solution designed for the food and beverage industry. It streamlines production by automating the entire process from cup dropping and cleaning to filling, sealing, and waste film recovery. Built with durable stainless steel, it ensures hygiene and reliability for packaging liquids such as water, yogurt, milk, juice, and condiments.

Technical Specifications

Compatible Sealing Materials

- Aluminum Plastic
- PP (Polypropylene)
- PE (Polyethylene)
- CPP (Cast Polypropylene)

Model Series	BG32 Series
Construction Material	Steel, Stainless Steel

Operational Features

Automated Functions

Cup Dropping • Cleaning • Filling • Sterilization • Photoelectric Tracking • Sealing • Core Cutting • Waste Film Recovery

Suitable Products

- Pure Water
- Yogurt
- Milk
- Soymilk
- Juice Drinks
- Seasoning
- Jam

Safety Features

Emergency Stop, Safety Guards
