

Automatic Cup Filling and Sealing Machine

This automatic cup filling and sealing machine is designed for efficient packaging of various products. It automates cup dispensing, filling, sealing, and date printing, ensuring consistent quality and high throughput.

Overview

High-Performance Packaging Solution

The BG60V/BG32V automatic cup filling and sealing machine is engineered for high-efficiency packaging across food, beverage, dairy, and cosmetic industries. This robust system automates the complete workflow, including cup dispensing, precise filling, sealing, and date printing to ensure consistent quality. Built with durable stainless steel, it offers a hygienic and reliable solution designed to maximize productivity while minimizing maintenance downtime.

Technical Specifications

Operational Features

- Adjustable filling volume
- Precise sealing temperature control
- Customizable sealing patterns
- Integrated safety features
- User-friendly control panel

Key Capabilities

Automatic Cup Dispensing, Precision Filling, Heat Sealing, Date Printing

Construction Material

Stainless Steel

Application Suitability

Suitable Industries

Food • Beverage • Dairy • Cosmetics
